Business Recommendations

Protect profitable growth: Prioritise Technology, which currently provides the strongest category profit and margin.

Improve low-margin categories: Investigate product costs, pricing and discount levels in Home & Kitchen.

Investigate regional profitability: Review the cost and discount structure in Central, which has the lowest regional margin.

Understand the late-year sales decline: Review customer demand, stock availability, promotions and sales activity behind the November and December declines.

Introduce discount guardrails: Require additional approval for high-discount orders and monitor orders with negative profit.

Track a monthly management dashboard: Monitor sales, profit, profit margin, order count, category growth and regional performance together.

Conclusion

The business generated **₹2,98,814.00** in sales and **₹54,423.34** in profit during the **2025** period, with an overall margin of **18.21%** . The results show differences between revenue leadership and profitability leadership across categories and regions. Management should focus on sustaining high-margin categories, addressing low-margin areas, and investigating the sharp month-on-month decline late in the year.
